

Brian J. Carroll

BUSINESS ADDRESS

Email: brian.j.carroll@nasa.gov

NASA Langley Research Center, Science Directorate, Lidar Science Branch

Currently working offsite – please contact if physical address is needed

RESEARCH INTERESTS

- Lidar applications and retrievals for water vapor, winds, and aerosol
- Planetary boundary layer processes and measurement technologies
- Cloud processes and circulations
- Aerosol distribution and transport
- Air quality
- Remote sensing

CURRENT PROJECTS

- Improvement of differential absorption lidar data processing routines
- Marine cloud process studies utilizing lidar
- Investigating water vapor circulations and related phenomena across scales
- Low-level jets (LLJs) and linkages to convection in the Great Plains

EMPLOYMENT

2020 – Present

NASA Postdoctoral Program (NPP) researcher

NASA Langley Research Center, Hampton, VA

- *Airborne water vapor differential absorption lidar (DIAL) data processing and utilization in studies of the planetary boundary layer, cloud processes, and circulations*

2014 – 2020

Graduate Student

Physics Dept.; University of Maryland, Baltimore County; Baltimore, MD

- *Field measurements and scientific analysis of atmospheric phenomena in the planetary boundary layer*
- *Focuses included remote sensing, lidar, planetary boundary layer, low-level jets*
- *Taught physics laboratory sessions for undergraduates*

Summer 2014, 2016

Research Intern

National Oceanic and Atmospheric Administration ESRL, Boulder, CO

- *Developed algorithm to retrieve mixed layer heights from Doppler lidar scans*
- *Field work and data analysis of Doppler lidar measurement uncertainty and dual-Doppler lidar wind retrievals*

2013 – 2014

Undergraduate Research Assistant

Physics Dept.; University of Maryland, Baltimore County; Baltimore, MD

- *Doppler lidar wind measurements and data visualization*

Summer 2013

Research Intern

Army Research Laboratory, Adelphi, Maryland

- *Doppler lidar wind and turbulence retrievals*

Brian J. Carroll

EDUCATION

- Ph. D. Atmospheric Physics; Univ. of Maryland, Baltimore County 2014 – 2020
- B.S. Physics; University of Maryland, Baltimore County 2009 – 2014

Doppler lidar observations of the mixing height in Indianapolis using an automated composite fuzzy logic approach, *J. Atmos. Ocean. Tech.* 35.3: 473-490. <https://doi.org/10.1175/JTECH-D-17-0159.1>

AWARDS

- NASA Group Achievement Award to OWLETS project 2019
- NASA international conference travel grant, *presentation items #4,9* 2019, 2017
- Poster presentation award, *presentation item #8* 2018
- Outstanding graduate teaching assistant 2015
- Poster presentation award, *presentation item #16* 2014

FIELD EXPERIMENTS

- LUMEX (2014): Doppler lidar intercomparison and evaluation of uncertainty
- PECAN (2015): Boundary layer meteorology, low-level jets, bore waves, MCSs
 - Doppler lidars, water vapor lidars, ceilometers
- SEAR-MAR (2017): Aircraft observations of the boundary layer
 - Airborne aerosol lidar, mission planning
- OWLETS-2 (2018): Ozone air quality in the Chesapeake Bay and Baltimore region
 - Doppler lidars, ozone lidars, in situ trace gas measurements
- AEROSE (2019): 31-day research cruise focused on aerosols over the tropical Atlantic
 - Ceilometer, in situ trace gas measurements

Brian J. Carroll

PROFESSIONAL SOCIETIES

- American Meteorological Society (AMS) Member 2016 – 2020
- American Geophysical Union (AGU) Member 2018 – 2020

OTHER EXPERIENCE

- Steering committee member, UMBC Earth Day Symposium 2017, 2018

SELECTED PRESENTATIONS
